Professional Summary

Associate Software Engineer with hands-on experience in full-stack web application development, including role-based systems, secure authentication, and RESTful APIs. Strong foundation in modern web development with internship experience in ERP systems. Seeks to contribute effectively to project success through resourceful and dedicated efforts. Actively pursuing opportunities to apply skills and knowledge for organizational and community benefit.

Work Experience

Software Engineer Intern – EchonLabs (Pvt) Ltd

(Jun 2022 – Feb 2023)

- Contributed to ERP system development for banking and insurance domain projects
- Developed and tested full-stack modules following Agile workflows
- Performed unit testing and API integration to improve system reliability
- Technologies: Angular, NodeJs, ExpressJs along with NestJs, MongoDB

Computer Hardware Technician – Omak Technologies (Pvt) Ltd

(Oct 2017 – Nov 2018)

- Installed, maintained, and repaired computer hardware systems and peripherals.
- Diagnosed technical issues, troubleshooting, networking and technical support.

Education

B.Sc. (Hons) Computing and Information Systems

(2019–2024)

Sabaragamuwa University of Sri Lanka – Second Class (Lower Division)

G.C.E. Advanced Level

(2017)

Dharmasoka College, Ambalangoda

Technical Skills

- Frontend: HTML, CSS, JavaScript, React, Angular, Bootstrap, Tailwind CSS
- Backend: Node.js, Express.js, NestJS
- Databases: MongoDB, MySQL
- Programming: JavaScript, TypeScript
- Tools: GitHub, Jest, Agile Workflows
- Current Learnings: Next.js, ASP .Net Core

Projects

Exam Management System

- Developed a role-based online examination platform with separate admin and student dashboards
- Implemented exam creation, timed assessments, and automated grading workflows
- Designed performance analytics and downloadable result certificates and real time Notifications

Technologies- React, NodeJS, ExpressJS and MongoDB (MERN Stack), Tailwind CSS

<https://github.com/Pradeepkaliyawansha/Exam-management-system>

AI-Powered Email Template Generator

- Built a drag-and-drop email editor with AI template generation capabilities.
- Built with Gemini API and featuring user authentication, customizable components, and responsive designs.
- Designed responsive layouts for cross-device email compatibility

Technologies-Next.js, TypeScript, Tailwind CSS, ConvexDB
<https://github.com/Pradeepkaliyawansha/AI-powered-email-generator>

Online Parking Booking System

- Developed a role-based parking reservation system for vehicle owners and parking providers
- Implemented booking management, availability tracking, and user workflows
- Designed RESTful APIs to handle reservations and user interactions
- Built as an undergraduate mini project focusing on full-stack development

Technologies- React, NodeJS, ExpressJS and MongoDB (MERN Stack)
https://github.com/Pradeepkaliyawansha/Online_Parking_Booking_System

Food Ordering Web-PHP Project

- Developed a food ordering platform with add-to-cart, menu customization, and online payment features
- Contributed to cart management and payment gateway integration as part of a team project
- Implemented user-friendly interfaces for ordering and checkout processes
- Ensured responsive design and functional reliability across browsers

Technologies-HTML, CSS, JS, Bootstrap, Jquery, My SQL and PHP
<https://github.com/Pradeepkaliyawansha/food-Ordering-web-PHP-Project>

My Portfolio Web App

- Designed and developed a personal portfolio to showcase projects, skills, and experience
- Implemented a responsive and user-friendly interface
- Highlighted professional profile and technical competencies through structured content

Technologies-Angular
<https://github.com/Pradeepkaliyawansha/MyPortfolioApp>
<https://pradeepkaliyawansha.github.io/MyPortfolioApp/>

Music Recommendation System by using the OCEAN Model to Predict User Preferences

- Developed a personality-based music recommendation system using the OCEAN model
- Implemented music genre classification using audio feature analysis
- Applied machine learning algorithms to predict user preferences
- Designed recommendation logic based on personality traits and music features

Technologies-Python, K-means, Euclidean Distance, Random forest

Certifications

-
- Computer Hardware Technician (NVQ Level 4)-2019
 - Tertiary and Vocational Education Commission
 - (Certificate Number- P04/0094000712)
 - Flutter for Beginners(Udemy)
 - .NET Full-Stack Developer(Coursera)
 - Get Started with JIRA(Coursera)

Soft Skills

Teamwork, Self-Learning, Creativity, Communication, Quick Learning
